

FUEL MANAGEMENT SOFTWARE

Secure and manage from a PC, the fuel consumption of a private fleet.

The fuel management software is a Windows application. All information will be issued to and from a PC.

LV8 allows centralization of several sites.

LV8 allows access to information from all the PCs connected to the INTRANET.

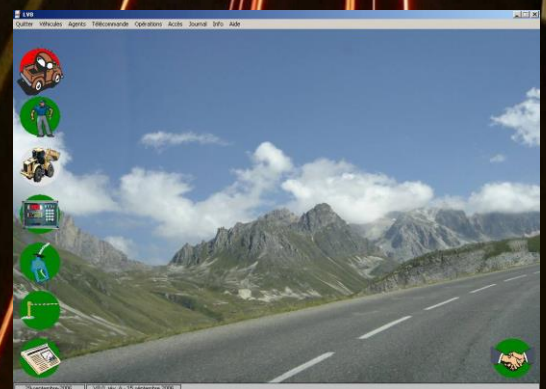

The software can be installed on any Windows PC.

By configuration, the database can be installed on a server. This allows sharing access to data from several PCs. ALL on the same site (no remote access)

Performance of the software :

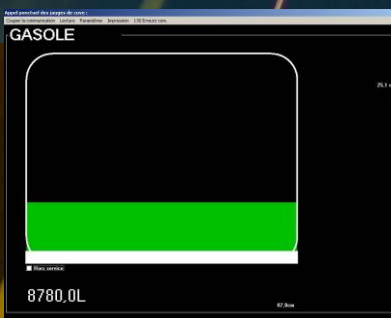

- ❑ Management of all ALX automatons
- ❑ 10 000 agents and 10 000 vehicles
- ❑ Consumptions per agent and per vehicle, per group
- ❑ Entry of external fuellings
- ❑ Colored view of stock in tanks
- ❑ Visualization of tank height indicators.
- ❑ Annual and/or monthly management of consumptions
- ❑ Appreciation of fuellings and supplies
- ❑ Local or remote control of the automaton
- ❑ Quota per agent / per vehicle
- ❑ Concept of doubtful fuelling (done in several times)
- ❑ Monitoring of supplies (purchase price per liter)
- ❑ Automated central management system for 100 sites
- ❑ Importation of external fuellings from fuel companies' billing files
- ❑ TIPP calculation and printout of customs documents
- ❑ Several authorized tanks per vehicle (4 tanks and 4 cons. per vehicle)
- ❑ Filtering fuellings by agent, by vehicle, by group, by date...
- ❑ Vehicle alarm on counter or on date (revisions...)
- ❑ Alarm on date by agent (medical check-up, training courses...)
- ❑ Print-out, display, configurable exportations.

Prerequisites

- ❑ The WINDOWS-compatible software is to be installed on any PENTIUM IV PC with at least 256 Mo free RAM and a 1024 x 800 monitor. It interacts with the other elements via a USB link (local automaton or connected by analog modem) or via the IT network according to the TCP/IP protocol.
- ❑ Can be installed on 3 **LOCAL** PCs sharing data on a server.

Options :

- ❑ GEO-TRACKING link server (allows automatic recovery of counters)
- ❑ Surveillance camera

Gauging / stocks

Reference	Description
LV8	LV8.0 software
GEL008	GEO-TRACKING link server
CAM008	Surveillance camera with recording module
